

G Ending Jobs Program CA Sanctions

REVISION 10
(10/01/09 – 12/31/09)

See [Reapplication After Sanctions](#) for either of the following:

- To end a 100% sanction.
- To end a 50% sanction when the case was closed for other reasons.

When the Jobs Program generates an alert of compliance the sanction must be ended. To end a 50% sanction in an active CA case, a new application is not required. Complete the following:

- End the sanction for the first month possible, following the month of the mandatory sanction period.
- Key the SANC END field with the date for which benefits may be increased to the 100% level. When there is more than one sanction being ended, key the month for each.
- Process through AFPD to authorize the restored benefits. It may be necessary to authorize CA supplements. (See [Authorize a CA Supplement](#)) When applicable, remove the [SA income](#) and authorize NA.
- Send the [A741 notice](#).

There may be situations when FAA ends a 50% or 100% Jobs sanction including, but not limited to, the following:

- A 100% sanction has been imposed stopping the CA benefits and a new application is received. (See [Reapplication After Sanctions](#))
- The CA case closed for other reasons and a 50% sanction was imposed. (See [Reapplication After Sanctions](#))
- Jobs Program staff have not sent an NOAA by the last day to request the NOAA for the appropriate month.
