

01 VEHI – Purpose/Overview

REVISION 47
(01/01/19 – 12/31/19)

In AZTECS **VEHI** is used to capture participant vehicle information.

Although vehicles are not counted in the resource determination, keying vehicle information on **VEHI** is an indicator of other potential situations needing additional exploration, such as, but not limited to the following:

- Expenses Exceed Income (EEI)
- Employment and Training (E&T) Hardships
- Childcare Transportation Expenses

TANF EXCEPTION

The [Hopi Tribal TANF](#) program excludes one vehicle from the resource determination.

Key additional vehicles on OTAS using the OA Other Asset Code.

Verification is not required unless questionable.

WARNING

For recreational vehicles and trailers, see [Other Asset Types](#).

For information on how to key in AZTECS use the AZTECS Yellow Pages.
(See [FAA7](#))
