

04 Newborn Participant Maintenance

REVISION 39
(12/01/15 - 01/31/16)

Deemed Newborn Categorical Medical Coverage is provided to a child reported as a live birth to a mother who was eligible for Title XIX MA in any category on the date of the child's birth.

When birth of a newborn is electronically reported to AHCCCS, the mother's and child's information is documented in AZTECS on the following during an automated overnight batch process:

- CADO
- AHCCCS DEEMED NEWBORN REPORT (CR600)

AZTECS also completes the following during the automated process:

- Sends the X113 notice asking for additional information about the child and the household.
- Sets an ACTS alert for 20 days to review the information received on the X113 notice.

The information returned on the X113 notice is treated as a reported change for CA and NA. For procedures, see [ACTS Alert Deemed Newborn – See CADO](#).
