

H Scheduling Medical Appointments

Medical appointments, subject to supervisory approval, can be made to establish eligibility under the [GA Medical Disability](#) criteria to assist in either of the following:

- A [local office medical eligibility decision](#).
- A [DMC medical and social disability decision](#).

The participant may not have enough medical information to establish disability. (See [Medical Disability Information and Verification](#)) When this occurs, the local office, based on supervisory approval, can arrange a medical appointment for the participant with a doctor contracted by FAA. (See [Scheduling Medical Appointments](#))

When the local office schedules a medical appointment the following apply:

- The local office provides the participant an Authorization for Medical Examination (FA-194) form to advise them of the following:
 - The time and place of the appointment.
 - The consequences for failure to appear for the appointment.
- The local office provides the participant with a Medical Statement (FA-196).
