

## A Providing Verification

Verification is proof of a subject, statement, or circumstance and is used to establish the accuracy of each eligibility factor.

---

### Policy

The participant has the primary responsibility for providing verification of eligibility factors.

FAA requires certain factors be verified for **all** of the following reasons:

- To establish the accuracy of information stated on the application.
- To address changes that become known to FAA or are reported by the participant.
- To aid in the accurate eligibility determination and benefit amount.

[Questionable\(g\)](#) verification must be resolved before determining benefits when it affects eligibility or benefit amounts.

The [Primary Informant\(PI\)](#) is not required to appear in person at the FAA office to provide verification. For information on providing verification, see [How to Provide Verification](#).

It is considered a conflict of interest for an employee to provide verification for participants. (For additional information about conflict of interest, see [Conflict of Interest – Employee, Contractor, Temporary Employee Reporting Responsibilities](#). When an employee is the only person who can provide the needed verification, the employee must get written approval from the office manager. For more information regarding an employee providing verification, see [Conflict of Interest](#).

### What is Verification

Documented verification, interface, and state hub verification are the primary sources of verification. Documented verification is written evidence (also known as hard copy). The verification process includes documented, interface and state hub, collateral contact, participant statement, and visually viewed verification.

The types of verification include, and are not limited to, **all** of the following:

- Documented verification

Documents are the primary source of verification. Documented verification is written evidence (also known as hard copy) originating from **any** of the following:

- An agency
  - Organization
  - Individual qualified to have knowledge of the required information
  - An agency or organizational website
- Collateral contact verification

Collateral contacts may be used when documented verification is not available. By signing the application, the participant has given FAA permission to make collateral contacts.

Collateral contacts are verbal attempts to verify information provided by the participant. Collateral contacts may be from **any** of the following sources:

- An agency
- Organization
- Individual qualified to have knowledge of the required information

FAA does not use a collateral contact to verify **any** of the following factors:

- Noncitizen status
- Relationship
- Social Security enumeration
- U.S. Citizenship
- Participant Statement Verification

Participant statement verification is the participant's account of a particular situation and may be received by **any** of the following methods:

- The participant's verbal statement of facts
- The current signed application
- A written participant's statement
- A completed Participant Statement Verification Worksheet (FAA-1111A) form located in the Document Center

NOTE A written participant's statement must be clear and concise, include all details, the participant's signature, and the date signed.

FAA uses participant statement verification when **both** of the following occur:

- Other attempts to obtain verification have failed
- Obtaining documented or collateral contact verification may cause harm or [undue hardship\(g\)](#) for the participant.

Participant statement verification cannot be used to verify **any** of the following eligibility factors:

- A1 Payment Standard
- Identity
- For NA permanent disability
- For CA medical disability
- NA drug disqualification removal requirement

- U.S. Citizenship
- Noncitizen status
- Relationship
- Social Security Enumeration
- State Verification Exchange System (SVES)  
SVES interface information is received by FAA as a result of computer matching between FAA and other agencies. The matching of computer system information is required by federal law.
- Visually Viewed Verification  
When another form of verification is not available certain verification may be visually viewed by an FAA worker. Visually viewed verification may be in the form of a photo, in-person viewed cell phone or another electronic source, a downloaded legal document etc.

The participant may request assistance from FAA after failing to obtain needed verification.

### How to Provide Verification

There are several ways for participants to provide needed documents:

- Online:  
See [www.healtharizonaplus.gov](http://www.healtharizonaplus.gov) and <https://myfamilybenefits.azdes.gov/>  
NOTE Upload, email, and fax documents to HEAplus (See [instructions](#) (PDF 378 KB))
- Mail:  
Arizona Department of Economic Security  
Verification  
PO Box 19009  
Phoenix AZ 85005-9009
- In person  
To find an office near you, see [DES/FAA Locations](#)
- By calling 1-855-HEA-PLUS (1-855-432-7587)

---

### Procedures

Eligibility factors or information that affects program eligibility and benefit level must be verified before completing an eligibility determination.

Request verification of mandatory eligibility factors when **any** of the following occur:

- Information provided by the participant is [questionable\(g\)](#)
- Information provided by a third party is unclear

- A change has occurred
- Verification is not in the [case file\(g\)](#)

NOTE Refer to the verification section of the specific policy for specific verification requirements.

When the budgetary unit, or a participant, is obviously ineligible based on information provided by the PI, **all** of the following apply:

- Do not request verification of the factor to establish ineligibility.
- Document the case file to support the determination of ineligibility.
- Deny or close the case and send the appropriate notice.

Income verification must be requested for NA when income is reported by a renewal application, change report, or data match and **any** of the following apply:

- The source of the income has changed
- The income is questionable or [unclear\(g\)](#)
- The reported income amount has changed by \$51 or more
- The previous verification in the case file is more than 59 calendar days old

When current verification is in the case file, do not request the verification again. Do not delay the eligibility determination for one program when required verification for a different program has not been received.

Quick Access Menu:

- [Documents Provided](#)
- [Using Participant Statement Verification](#)
- [Using the State Verification Exchange System](#)
- [Resolving Questionable or Unclear Information](#)
- [Requesting Verification](#)
- [Required Documentation](#)
- [Prudent Person Concept](#)

### Documents Provided

Verification documents received at the interview and immediately uploaded to the [case file\(g\)](#) are not required to be date stamped. Any documents not uploaded on the same day must be date stamped before uploading. This process provides verification of the actual day the information was received by FAA.

All applications and dropped off verification (mail, fax, dropped off in the FAA lobby) must be date stamped.

For the safety of the participant, do not upload any document that shows the actual address of an Address Confidentiality Program (ACP) participant. Any person who intentionally obtains or discloses information regarding the physical address of an ACP participant is potentially guilty of a class one misdemeanor. (See [ACP](#) for more information about the program)

### Using Participant Statement Verification

Participant statement verification cannot be used for verification of mandatory eligibility factors unless **all** of the following apply:

- No other source of verification is available. This includes documented and collateral contact verification.
- The participant has requested assistance from FAA.
- The worker has evaluated the request for assistance and cannot obtain the verification from another acceptable source.
- The participant's statement is not [questionable\(g\)](#).

**NOTE** Do not send an information request notice for a participant's statement. When a participant's statement is questionable, clarify questionable information with the participant and clearly document the case file.

Use participant statement verification as the primary source of verification at the interview when policy permits the use of participant statement verification, and **any** of the following occur:

- Documented or collateral verification is not available
- Verification that is not for a mandatory eligibility factor is not available
- Obtaining documented or collateral contact information will cause harm or undue hardship

When a participant's verbal statement is used as verification, the case file must be documented to indicate the details of the statement the same as if the participant was writing the statement.

### Using the State Verification Exchange System (SVES)

FAA obtains some verification through computer matching between FAA and other agencies, for more information, see the [SVES](#). Information provided through SVES by the primary source of the information is considered [verified upon receipt\(g\)](#).

The sub-systems or screens used in SVES include **all** of the following:

- HOUSEHOLD SYSTEM CHECK (HOSC)
- BENEFIT AGENT CLAIM INQUIRY
- WIRE THIRD PARTY INFORMATION (WTPI)
- BENDEX INFORMATION (BDXI)

- Beneficiary Exchange Earnings Record
- HEAplus SOLQI Response Data Summary

When the collateral contact is not acceptable or is unavailable, FAA completes **one or more** of the following:

- Requests another collateral contact
- Chooses another collateral contact
- Requests another form of verification
- Conducts a home visit

### Resolving Questionable or Unclear Information

Consider all circumstances when deciding whether information is questionable or unclear.

Verify information that is questionable or unclear when it affects eligibility or benefit amounts. Document the case file to explain the reason the information is considered questionable or unclear.

NOTE Questionable and unclear verification must be resolved before determining benefits.

Consider information provided by the PI as questionable when it appears to be altered or fraudulent or is inconsistent with **any** of the following: (See [Example 1](#))

- Other statements
- Information on the current or previous applications
- File documentation
- Information received by FAA from a third party

Consider information received by FAA from a third party as unclear when the information meets **one** of the following:

- The information conflicts with information provided by the participant for the same time period and it is significant enough to bring the participant's continued eligibility into question.
- The information is fewer than 60 calendar days old and is required to be reported under the reporting requirements that apply to the participant.

Send the appropriate information request notice requesting verification necessary to resolve the discrepancy. Give the participant ten calendar days to provide the verification.

Determine eligibility when the additional information is received. Document the verification used to resolve the issue.

Information may continue to be unclear, questionable, or not provided within the required verification time frames. When this occurs, deny the application or stop benefits allowing for [Notice of Adverse Action\(g\)](#). Use the Denial Closure Reason Code appropriate to the information that was unclear, questionable, or not provided.

When requested verification for NA is not provided, send the NA Denial Closure (F200) notice. List all of the requested verification that was not provided.

### Requesting Verification

Request verification when the participant does not have the documents to verify eligibility factors at the time of an interview or a reported change. Do not delay the eligibility determination for one program when required verification for a different program has not been received.

Verification can be requested using **any** of the following:

- Information request notices sent in AZTECS. For a list of information request notices, see [Notice Listing](#).
- The Information Request and Pending Information Agreement (FAA-0077A) form. This form must be signed by both the participant and the worker, then uploaded to OnBase.

AZTECS verification notices and the FAA-0077A form identify **all** of the following:

- The eligibility factors to be verified
- How the eligibility factors can be verified
- The budgetary unit participant whose responsibility it is to provide the information
- The date the verification is due

When all eligibility factors have been requested on the RFI, an additional AZTECS request notice does not need to be sent. When all verification has been correctly requested, and there is no additional verification required, do not send another AZTECS request notice.

Send an AZTECS request notice after a telephone interview or a reported change when the RFI did not list the necessary eligibility factors.

When both an RFI and an AZTECS information request notice are sent and each display a different due date, consider the later date as the information due date.

Do not request any verification items that meet **one or more** of the following:

- Were already provided through hard copy or collateral contact.
- HEAplus Verifications Status page indicates verified.
- Were already requested in an associated HEAplus application RFI.

When denying an NA or CA case for failure to provide verification, send the appropriate Denial Closure Notice. Do not list verification items in the Denial Closure Notice that meet **any** of the following:

- Were already provided
- Were obtained through a collateral contact
- Were not included in any verification request related to the application that is being denied

## Required Documentation

Documentation must support determinations of eligibility and benefit amounts and contain sufficient detail to allow a reviewer to decide that the determination is reasonable and accurate.

Written documentation must be clear, concise, and placed in the case file. Places where documentation may be written or keyed include, and are not limited to, **any** of the following:

- AZTECS screens that allow documentation including, and not limited to, the Case Documentation Screen (CADO)
- Health-e-Arizona Plus screens that allow documentation entry including, and not limited to, Case Notes
- Program forms

When written documentation is not readily available, verbal verification through a collateral contact may be used for nonmandatory eligibility verification factors. When a collateral contact is made, document **all** of the following:

- Name, phone number, and the title of the contact
- Information provided by the collateral contact (e.g., dates and amounts of pay, financial account balance, names of persons living at the address, etc.)
- Date of contact
- Any attempts made when the participant requests assistance

When verification is visually viewed, complete the Affidavit of Visually Viewed Documentation (FAA-1796A) form when possible or document **all** of the following information in the case file:

- The title or type of verification (e.g., pay stubs, rent receipt, mobile phone text receipt, etc.)
- The names and contact information from the verification
- The date the verification was issued
- The date the document was viewed
- The signature, Security Key (D0/V0), or Personnel Control Number (PCN) of the viewer
- Applicable information from the document

NOTE For income verification, include, when available, **all** of the following:

- The pay period ending date
- Hours worked
- Rate of pay
- Gross amount of income

- The date paid

When an OnBase document is used to verify information, print the information and upload to OnBase, or document **all** of the following:

- The case number where the document was printed or visually viewed
- The document type
- The document handle number

### **Prudent Person Concept**

Prudent person decision making (also known as critical thinking) strengthens the worker's policy knowledge, confidence, and decision-making capabilities within FAA.

Make all eligibility decisions using reasonable judgment, based on knowledge of and experience with the programs. Research any [questionable\(g\)](#) or [unclear\(g\)](#) situations thoroughly by using the verification available, which may include electronic sources, and make a decision based on these findings.

Document the case file to show the reasoning that led to the decision. Include the Cash and Nutrition Assistance Policy Manual references used in making the decision.

After thorough research into the questionable or unclear situation, and consulting with management, FAA staff may still not understand the intent of the policy. When this occurs, authorized staff must request a policy clarification. See [policy clarification](#) for more information on what actions to take when policy is not clear.

---

### **AZTECS Keying Procedures**

When verification is obtained, key **one** of the following applicable Verification Codes in the VR field on the appropriate AZTECS screen:

- HC when documented verification is used, including documents that are uploaded to the case file.
- CC when a collateral contact is the source of verification used.
- CS when participant statement verification is used.
- IN when a system [interface\(g\)](#) has verified the information.
- AG when FAA has verified the information, i.e., system reports.
- VV when the verification is visually viewed by the worker and documented in the case file.
- UT when verification is provided untimely, and the budgetary unit is not eligible for NA Transitional Benefit Assistance (TBA).
- PE when verification is pending. AZTECS does not allow benefit authorization when PE is in the verification field for a mandatory eligibility factor.

NOTE AZTECS generates an alert when the verification requirement is still outstanding on the date keyed in the PEND field.

- PP when verification is postponed for NA expedited services. (For more information on postponing verification for an NA expedite application, see [Postponed Verification](#))

See [Citizenship Keying Procedures](#) for verification codes specific to U.S. Citizenship.

---

### Examples

- 1) Jane's daughter, Judy, receives SSA benefits because her father has a disability. Jane reports that Judy is receiving SSA, but does not report SSA income for Judy's sister, Jean. Judy and Jean have the same father. Judy's SSA benefits are listed on ININ, while Jean's ININ screens are blank.

Frequently, when one child or spouse receives SSA as the beneficiary of a person who is deceased, retired or has a disability, other related participants also receive these benefits.

It is not uncommon for information of this nature to be displayed on ININ for some participants and not others. This is considered [questionable\(g\)](#) information and requires further investigation.

---
