

D NA Expedite Applications With Postponed Verification

When necessary, postpone any [required verification](#) except the identity of the PI to ensure [NA Expedite time frames](#) are met.

Verification postponed to comply with the NA Expedite time frames must be provided within 30 days of the date of application. Complete the following:

- The PI must provide or apply for a Social Security Number (SSN) for each participant in the case before the second month's benefits can be issued.
- Do not allow expense deductions that are not verified within the 30 day deadline. Delete the deductions from the first possible month, and refer to Overpayments, when applicable.
- When the participant fails to provide postponed required verification, close the case.

When the participant applies after the 15th day of the month, issue NA benefits for the second month as an [aggregate allotment](#). Issue the aggregate allotment even when verification, including Social Security Enumeration, is postponed. Do not issue NA for the third month until the requested verification is provided.
