

01 WERE/CODC/CODF - Purpose

REVISION 51
(01/01/23 – 12/31/23)

WERE, CODC, and CODF are used to track and display information regarding a participant's CA and NA eligibility. Statistics are compiled and reports generated to meet federal reporting requirements.

Edit messages are displayed on WERE to prompt staff to key codes in the WERE EXPT RSN AF fields.

An asterisk (*) displays on WERE next to each participant when **all** of the following apply:

- The participant is age 18 through 52
- The TI BEGIN field on CODF is blank

When an asterisk displays on WERE, the worker must key the date in the TI BEGIN field on CODF.
