

## .02 Duration of Disability

[REVISION 27](#)  
(01/01/14 - 03/31/14)

The disability must be expected to continue at least 30 days from the date of application. When the disability lasts for less than 30 days, do not approve CA or [1931](#) MA unless other [deprivation factors](#) exist.

The budgetary unit is eligible based on disability for each month that the parent remains disabled.

### CA WARNING

The parent must be disabled as of the payment date for each month. When the disability stops on or before the payment date, deprivation does not exist, and CA must be stopped for the next payment month, allowing for [NOAA](#).

(See [Changes](#) when disability no longer exists)

Medical Re-evaluation: The medical statement may indicate that the participant needs to be examined. When this occurs, take the following actions:

- Set an alert on EWAL to request a new disability statement.
- Completely review the case to determine continued eligibility.
