

.02 Tribal CA-PG Deprivation Determination by Hand

REVISION 14
(10/01/10 - 12/31/10)

Complete the following to determine whether the unborn is considered to be deprived of parental support or care when the father of the unborn resides with the participant:

- Complete a hand budget using the CA/MA Income Maximum and Needs Test (FA-200-A) and CA/MA Budget Record (FA-200-B).
- Determine income eligibility using income of all mandatory participants who would be included in the budgetary unit as if the baby was born. (See [CA Mandatory Participants](#))

NOTE Complete a hand budget using the FA-200-A and B since AZTECS cannot complete the determination in this situation because no CHILD is coded IN on SEPA. The FA-200-A and B and instructions to complete them can be found in the [Digital Library](#).

- Compare the budget results to the CA Income Standard.

When the hand budget results indicate there is at least one cent (\$.01) NET NEED showing on the budget, the Unborn is considered deprived of parental support or care and the pregnant participant is eligible for Tribal CA-PG TANF.

When the hand budget results indicate there is NOT at least one cent (\$.01) NET NEED showing on the budget, the Unborn is NOT considered deprived of parental support and the pregnant participant is NOT eligible for Tribal TANF.
