

.01 Maintaining the CA-PG Case

When CA-PG is approved, set an EWAL alert for ten days before the end of the EDD month. Send a NOAA informing the PI that CA benefits will stop the following month. Complete the following:

- Do not stop the benefits when the participant reports she is still pregnant. Set an EWAL alert to send another NOAA and stop benefits the second month following the EDD month.
- Convert the CA-PG to regular CA when the participant reports her baby has been born. (See [Converting from CA-PG to CA](#))
- Stop CA when the participant fails to respond to the NOAA.

When the baby is born in a month before the month of EDD, the participant must report the end of pregnancy within ten days. When reported timely, an overpayment does not exist.
