

O Determining the TPEP Six Month Limit

The TPEP budgetary unit may receive up to six months of TPEP payments in a 12 month period.

The 12 month period always ends in and includes the month that eligibility is determined. Determine the 12 month period each and every month. (See Example [TPEP Six Month Limit](#))

The Active Cases Listing (CR300) report displays a # PD TPEP field. AZTECS calculates the number of months the TPEP budgetary unit received TPEP in the 12 month period; that number is displayed in this field.

Count the following benefit months to determine the six month TPEP limit:

- All months TPEP was issued, whether received for all or a portion of the month.
- Months TPEP was issued as a supplemental payment. This would be due to a regular CA benefit changing to TPEP.
- An Eligible No Pay TPEP month when payment would have been issued. The payment would have been for all or part of the month, but the benefit was less than ten dollars.

Do not count the following benefit months to determine the six month cash limit:

- A TPEP payment was not issued.
- TPEP was received from any other state.
