

C Verification Methods of Liquid Assets

Methods of verification of liquid assets may include any of the following:

- Written verification such as a signed release to the appropriate institution.
- A [collateral contact](#) when the participant provides the name of the contact.
- A scheduled home visit only when other collateral or written verification is not available or is insufficient to make a determination.

When verification has not been received by the processing deadline and the participant is continuing to cooperate, complete the case using the best available information with supervisory approval.
