

## **01 AFNN - Purpose**

AFNN displays the results of the [CA Need Standard Net Income Test](#). This income test is used when determining [prospective eligibility](#) for CA benefits. This is the second of three income tests used when determining prospective eligibility.

Countable net income must be less than the applicable [A1](#) or [A2](#) CA need standard for the budgetary unit to be eligible. The CA need standard income test results are displayed on AFNN based on information keyed on income screens, expense screens, and SEPA.

(See [CA Need and Net Income Test Overview](#))
