

I QC District X – Overview

REVISION 17
(07/01/11 - 09/30/11)

When the Program Manager or designated staff agrees that the error cited exists, but that the error occurred due to something that is beyond their control, they may charge the error to District X (pronounced District Ten).

The purpose and intent of charging errors to District X is to identify errors that are entirely caused by FAA entities other than the local office. District X includes, but is not limited to, one of the following:

- Policy Support Team
- FAA Systems

NOTE Participant caused errors are NOT eligible for District X consideration.

When, after removing errors that are caused by other FAA entities, an error still exists by the local office, the error must be cited to the local office.

For policy and procedures regarding QC District X Procedures, see QC District X Procedures.
