

## **J QC District X - Overview**

When the Program Manager or designated staff agrees that the error cited exists, but that the error occurred due to something that is beyond their control, they may charge the error to District X.

The purpose and intent of charging errors to District X is to identify errors that are entirely caused by other FAA entities, such as Policy Support Team or FAA Systems, other than the local office. When, after removing errors that are caused by other FAA entities, an error still exists by the local office, the error must be cited to the local office.

Policy and procedures regarding QC District X are outlined as follows:
