Someone may move into the home during the Four-Month Continued Coverage period. When this occurs, determine whether the participant was included in the [1931 budgetary unit](#) at the time of 1931 closure.

When YES, verify all required eligibility factors to add the applicant and add the applicant when verification has been provided.

When NO, determine whether eligibility exists for the applicant in any MA category.

04 Eligibility for Remaining Balance of Four-Month Continued Coverage

[For MA after 2013](#)
[See the EPM](#)

AZTECS tracks the Four-Month Continued Coverage period. When participants reapply for MA, AZTECS determines whether a balance is remaining in the four-month period.

Participants are eligible to receive any remaining balance of the original Four-Month Continued Coverage period when all of the following are met:

- They reapply for MA and are determined to be ineligible in the 1931 MA category.
- Arizona residency requirements continue to be met.
- A dependent child who was an eligible participant in the last month of 1931 eligibility resides in the home.

When ALL applicants are determined to be ineligible for the remaining balance of the Four-Month Continued Coverage period, AZTECS displays on MADA the determination RESULT for the last MA category tested.

When eligibility exists in another category, authorize the determination on MADA.
