FAA1.H Benefit Replacement Procedures : **06 NA Replacement - Overview**

06   NA Replacement - Overview

To issue a full or partial replacement of Nutrition Assistance (NA) benefits, the following must be completed:

- Key necessary information, and press ENTER to authorize the replacement. AZTECS updates the benefit records for the case. The update reflects the fact that the original benefit is being replaced.

- When it is a full or partial replacement, AZTECS changes the Document Status Code on FSIH to FR or PR respectively, and displays the Replacement Reason keyed on FSRE. AZTECS creates a benefit type that is the same as the original.

  AZTECS sets the Issuance Indicator to DA so the replacement is issued at the next daily issuance run.

- The delivery method is always E (Electronic Benefit Transfer (EBT)).

- AZTECS generates the X006 notice informing the PI of the replaced benefits.
