

### .13 OR Relationship Code

OR is a valid Relationship Code on the following AZTECS screens:

- HEID, in the RELATIONSHIP TO INSURED field
- REAP, in the REL field
- SEPA, in the REL field
- SPRD, in the NON-PARENT field
- SPRD, in the SPECIFY REL field

Use OR to enable AZTECS to process eligibility that requires relationship. For example, the parents of a child in common may not be related to each other, but OR enables AZTECS to determine eligibility for the child and both parents as a family.
