

.04 Immunization Reconciliation

One of the following is required to end an immunization sanction:

- The PI's written statement of compliance with immunization requirements.
- The PI's written statement of [Immunization good cause](#) to exempt the participant from the Immunization requirement.
- A new application as [intent to comply](#). Consider the application as an instance of reconciliation.

When verification of compliance is received, key the SANC END date on DISA. Place any written verification in the [case file\(g\)](#). Document the DOC field on DISA, FA-015, CADO with action taken to end the sanction.

When verification of compliance is not received within ten calendar days of the request, and good cause has not been established, elevate to the [Policy Support Team](#).
