

.03 Ending the Postpartum Period

AZTECS calculates the end of the postpartum period using the date in the **EDD** field.

When the case is in the current system month, AZTECS sends a ten day advance notice to the PI. This notice advises the S.O.B.R.A. Woman that her MA will stop. (See [Auto Exparte](#))

Before stopping MA, determine eligibility for any other category when information regarding current circumstances has been requested and obtained. Process the determination through **MADA**. AZTECS determines whether eligibility exists in another category.

When the woman is ineligible in any other category, stop MA by keying the Denial or Closure Reason Code in the DEN/CL REASON field on MADA.

When information is not available or is not provided that would allow a determination in another category, key PP to stop benefits.

NOTE Stopping S.O.B.R.A. Woman with PP or EI allows [Family Planning Extension](#) when S.O.B.R.A. eligibility ends.
