.02 Pregnancy Has Ended

When AHCCCS is informed of the baby's birth, AZTECS is automatically updated with the Deemed Newborn information through the Newborn Automated Process.

A source other than AHCCCS may report the baby's birth. When this occurs complete the following steps:

- Update the unborn information on CLIM with the reported information

- Authorize the Deemed Newborn category on MADA.

A pregnancy may end for any of the following reasons:

- Stillbirth

- Miscarriage

- Abortion

- No Proof of Pregnancy

When this occurs, complete the following:

- Remove the unborn from the case.

- Complete a determination for postpartum eligibility for the S.O.B.R.A. Woman.

- Update the Unborn information on CLIM.

- AZTECS updates the PG TERM DATE field on MAST. (See Stillbirth, Miscarriage, or Abortion for specific keying procedures)

- Authorize the S.O.B.R.A. woman's eligibility to ensure her MA through the postpartum period.

- Copy details into the month after the postpartum period ends. Determine the mother's eligibility for other categories.

When the participant is ineligible in all other categories, stop MA benefits using the PP Denial or Closure Reason Code.

Send the M410 notice.
