08   Arizona Tracking Display (AZTD) for CA - Overview

REVISION 14
(10/01/10 – 12/31/10)

Effective July 01, 2010, budget reconciliation legislation was implemented which limits the length of time that an eligible CA budgetary unit may receive CA benefits. The Arizona Tracking Display (AZTD) screen tracks CA and displays CA benefit information pertaining to State benefit Limit (STBL(g)).

When a Y is keyed in the AZ LIMT DISP field on WERE, AZTD displays.

To view CA payment history, key Y in the HISTORY field on AZTD.

When N displays in the HISTORY field, there is no historical information.

On AZTD, the first character of the two-character code that displays under the JAN ... DEC fields identifies a Tribal TANF case. Beginning with the benefit month of October 2002, when the payment was received through a Tribal TANF program, the first character displays as follows:
