

.04 Initial Compliance

Notification of compliance is updated in AZTECS through an interface with the Jobs AUTOMATED SYSTEM (JAS). Review AFBH to ensure benefits are issued. The issuance indicators on AFBH display S1 and S2 to show that the participants have complied with work program requirements, and the benefits have been released.

When no notification of compliance is received, complete the following:

- Contact the Jobs office within ten calendar days after the preapproval notice has been sent when AFBH continues to display the H1 and H2 indicators. When the participants have not begun participation, deny the benefits and send the appropriate TPEP [CA denial or closure notice](#).
- Authorize NA and remove unissued TPEP payments displaying as income on UNIN.

NOTE Consider the parents in compliance until Jobs notifies FAA otherwise.
