

P Expiration of TPEP Six Month Limit

Monitor the Active Case Listing (CR300) report. After TPEP benefits have been issued for five months, determine eligibility for CA.

TPEP eligible participants may reach the six month TPEP limit and be ineligible for CA. When this occurs, complete the following to close the TPEP case:

- Key UE in the DENIAL CLOSURE REASON field on AFED. Key this code on or after the first day of the sixth month. Key the first day of the month following the sixth month in the INELIG DATE field.
- Send the [A206 notice](#).

Some participants may be CA eligible, while others are not. In this situation, complete the following procedures:

- Change the Participation Code of the CA ineligible participants to OU, and the Participation Code of the stepparent to ST in the PT field on SEPA.
- Key UE in the INELIG RSN field on SEPA for each CA ineligible participant. Key the first day of the month following the expiration of the time limit in the INELIG DATE field.
- Remove the U and P TPEP indicators on SSDO.
- Reauthorize the CA benefit as a regular CA payment on AFPD. The remaining participants receive CA benefits.
- Send the [A747 notice](#). The A747 informs the PI of the following changes:
 - Change in benefits
 - Participant status
 - Continued CA benefits for some participants

NOTE A new application is required when the stepparent who is not the PI wants to apply for their own children.
