

## 02 **EDWO - Purpose**

EDWO is a calculation screen used to establish countable amounts of unearned educational income.

The educational income and expense totals, divided by the number of periods (months) they are intended to cover, equal the countable amounts for each program as displayed on UNIE.

EDWO provides fields in which educational income and expenses may be keyed.

EDWO calculates the countable amount of educational income after deducting allowable expenses. The net amount is divided over the period of time it is intended to cover.

### **WARNING**

Information keyed on EDWO is NOT saved. Only the totals display on UNIE. A screen print of EDWO MUST be placed in the case file.

Press ENTER to return to UNIE when all information has been keyed on EDWO. The monthly COUNTABLE amount is displayed for each program on UNIE.
