A   Eligibility Worker Alerts Due Today or Overdue

This screen displays all alerts that are due or overdue for the current date in the caseload corresponding to the EI's PCN, as follows:

- The cases are listed in Case Number order, starting with the smallest number.

- The alerts are shown by due date, starting with the oldest date.

This is a display only screen. Alerts cannot be cleared or added on EWAD. (See EWAL for additional information on alerts)

NOTE   Supervisors may review alerts by keying the EI's PCN on SUAM and selecting the ALERTS DUE TODAY OR OVERDUE function.

When an EI signs on to AZTECS an edit message displays in the upper right hand corner of ELWM when there are alerts due or overdue in the EI's caseload. The message is displayed as * ALERTS * . These alerts can be viewed (not changed or deleted) by selecting function 7 on the ELWM menu or by keying EWAD in the NEXT field.
