

## .02 Effecting Multiple Changes - Simplified Reporting

When two or more changes occur and are reported on the same change report, determine the net effect of all changes.

### WARNING

A participant CANNOT be added unless their income and resources, when applicable, are included.

When the net effect of multiple changes results in a benefit decrease, treat the changes individually as follows:

- Effect changes that result in a benefit increase for the following month. (When adding a new participant, see [Causes an Increase In Benefits](#))
- Effect changes that result in a benefit decrease allowing for [NOAA](#). (See [Effecting Decreases](#))

NOTE When changes are reported separately, effect the changes separately.
