

01 REPT - Purpose

REPT is used to reopen a case when benefits were stopped or denied.

Use REPT to correct a case in ANY of the following situations:

- The budgetary unit is eligible for ongoing benefits.
- A redetermination is required.
- The case was closed with an incorrect Denial or Closure Reason Code.

When the correct Denial or Closure Code is keyed, review NOHS to determine whether a revised notice must be issued. When MA is reopened to use the correct code, the case MUST be reopened and closed or denied on the SAME day.

- The incorrect case was closed.

It is not necessary to reopen a CA or NA case to issue corrective payments for prior months when the budgetary unit is not currently eligible for ongoing benefits. (See [Supplemental Benefits](#))

(See [Revert Program to Open Overview](#))
