

B Maximum NA Resource Limit

[Previous Years](#)

Effective 10/01/2022

The maximum resource limit for NA when all participants are age 59 or younger and are not disabled is \$2750.

The maximum resource limit for NA when one or more participants are age 60 or over or are disabled is \$4250. (See [Elderly or Have a Disability - NA Special Considerations](#)) (See [NA Resource Determination Overview](#) for policy and procedures regarding resource determination for NA.)

Maximum NA resource limits do not apply to NA budgetary units that meet [Basic or Expanded Categorical Eligibility](#) requirements.

NOTE When an NA case is denied or closed because the budgetary unit (BU) received [lottery or gambling winnings](#) equal to or more than the [Winnings Reporting Amount](#), the BU does not meet the categorically eligibility criteria. Upon reapplication, AZTECS counts any remaining lottery or gambling winnings as a resource. The household must pass the NA resource limit to be eligible for NA benefits again.
