

03 AFIP Workstations - Overview

AFIP workstations are used for administering and maintaining fingerprint imaging. Each AFIP workstation is equipped with an AFIP Enrollment Workstation Operator's Guide provided by the vendor. The operational guide is a stand-alone resource guide containing detailed information about AFIP, and can be referenced by AFIP workstation operators when initiating and accessing fingerprint imaging records.

Policy and procedures regarding AFIP workstations is outlined as follows:

- [AFIP Workstation Types](#)
- [AFIP Workstation Operator Security](#)
