01   GACD - Purpose

GACD tracks a participant's GA benefits, displaying a code that indicates whether a month is countable or not countable during the 36-consecutive-month period. The codes display as follows:

- X = GA countable month.

- O = GA not countable month.

- E = GA countable additional month, effective 07/01/02.

- C = GA not countable caretaker month, effective 02/01/01.

Determine the number of GA benefits received by counting the X payment indicators included in the current 36-consecutive month period.

All months with an X indicator are countable months included in the GA BENEFIT COUNTER.

The combined total of the X and E payments issued during the current 36-consecutive month period displays in the GA BENEFIT TOTAL field.

(See General Assistance Counter Display Overview)
